

DHRUV VERMA

Ghaziabad, Uttar Pradesh • +91 9667580400 • dhruvverma.1877@gmail.com • [linkedin.com/in/dhruvverma364](https://www.linkedin.com/in/dhruvverma364)

PROFESSIONAL SUMMARY

CompTIA Security+ Certified Cybersecurity Graduate with hands-on experience in Security Operations Center (SOC) workflows, Threat Management, Incident Response, Vulnerability Assessment & Penetration Testing (VAPT), Security Monitoring, Network Security, and Cybersecurity Operations. Skilled in Alert Analysis, Incident Triage, Threat Detection, Security Incident Investigation, Log Analysis, Security Event Correlation, Risk Assessment, and Vulnerability Management. Experienced with Wireshark, Nmap, Burp Suite Professional, Linux, IDS/IPS, Firewalls, VPN Security, and Identity & Access Management (IAM). Strong understanding of SIEM fundamentals, EDR concepts, MDR concepts, Threat Intelligence, Security Controls, and Incident Escalation procedures within enterprise environments.

CORE COMPETENCIES

Security Operations: Security Operations Center (SOC), SOC Monitoring, Incident Response, Incident Triage, Alert Analysis, Security Escalation, Security Incident Investigation, Security Operations Workflow

Threat Management: Threat Detection, Threat Intelligence, Threat Analysis, Security Monitoring, Security Event Analysis, Security Event Correlation, Cyber Threat Analysis

Risk & Compliance: Vulnerability Management, Risk Assessment, Root Cause Analysis, Security Controls, GRC Fundamentals, Security Compliance, Security Governance

Infrastructure Security: Network Security Monitoring, IDS/IPS, Firewalls, IAM, VPN Security, Linux Security, Secure Configuration Management

EDUCATION

UPES, Dehradun

B.Tech Computer Science (Cybersecurity & Forensics), SGPA: 8.27

Aug 2022 – May 2026

Seth Anandram Jaipuria School, Ghaziabad

Class XII, GPA: 8.70

Apr 2021 – Mar 2022

Seth Anandram Jaipuria School, Ghaziabad

Class X, GPA: 9.22

Apr 2019 – Mar 2020

EXPERIENCE

Cybersecurity Intern — Tata Power Delhi Distribution Limited (TPDDL)

Apr 2026 – Jun 2026

- Conducted **20+ Vulnerability Assessment & Penetration Testing (VAPT)** engagements using **Burp Suite Professional**, identifying and validating OWASP Top 10 vulnerabilities including SQL Injection (SQLi), Cross-Site Scripting (XSS), authentication weaknesses, and security misconfigurations.
- Performed security event analysis, incident investigation, vulnerability validation, threat identification, and security troubleshooting activities in authorized lab environments, strengthening understanding of SOC monitoring and incident response workflows.
- Conducted log analysis, network traffic analysis, and security event investigation using Wireshark, Nmap, and Burp Suite Professional to identify indicators of compromise, attack patterns, and security weaknesses.
- Applied CIS Benchmarks, operating system hardening, network hardening, security controls, and secure configuration management practices to improve security posture and reduce attack surfaces.
- Assisted in vulnerability management activities including vulnerability identification, risk classification, remediation tracking, root cause analysis, and technical reporting.
- Produced 15+ technical security assessment reports containing risk ratings, remediation recommendations, security control enhancements, and operational improvement measures.

Network Security Intern — TP Power Plus Ltd.

Jun 2025 – Jul 2025

- Assessed the security of cloud-based smart meter infrastructure supporting utility operations, focusing on network security monitoring, secure architecture, access control, and cyber risk reduction.
- Configured and validated VPN connectivity, certificate-based authentication, Identity & Access Management (IAM) policies, and security controls to strengthen secure communications.
- Evaluated network security across 100+ connected nodes through configuration reviews, risk assessment, vulnerability identification, and security analysis activities.
- Collaborated with stakeholders to recommend remediation measures, security enhancements, and operational improvements aligned with cybersecurity best practices.

- Contributed to maintaining the integrity, confidentiality, and availability of critical operational systems and network resources.

Cybersecurity & IoT Intern — IBM

Jun 2025 – Jul 2025

- Developed an ESP8266-based Intrusion Detection System supporting threat detection, security monitoring, and security alert generation for perimeter security use cases.
- Built Python-based logging, telemetry collection, alert generation, and event synchronization mechanisms supporting security event analysis workflows.
- Conducted testing, troubleshooting, and operational analysis under varied environmental conditions to improve detection accuracy and reduce false positives.
- Documented technical procedures, operational findings, and troubleshooting guides to support knowledge management and future system improvements.

TECHNICAL SKILLS

Security Operations: SOC Monitoring, Incident Response, Incident Triage, Alert Analysis, Security Incident Investigation, Security Escalation, Threat Detection, Threat Management

Security Monitoring Tools: SIEM Fundamentals, EDR Concepts, MDR Concepts, Security Event Correlation, Log Analysis, Nmap, Wireshark, Burp Suite Professional, Metasploit

Network & Infrastructure Security: IDS/IPS, Firewalls, VPN Security, IAM, Linux Security, Secure Configuration Management

Risk & Governance: Vulnerability Management, Risk Assessment, Root Cause Analysis, Security Controls, GRC Fundamentals, Incident Examination

Standards & Compliance: ISO/IEC 27001, PCI DSS, CIS Benchmarks, Security Policies, Security Procedures

Programming & Analytics: Python, SQL, HTML, Pandas, NumPy, Matplotlib, Security Analytics

Platforms: Linux, MySQL, Power BI, Microsoft Office, VS Code

PROJECTS

Cognitive Honeypot for Cyber Attack Detection

- Designed and deployed a multi-service cognitive honeypot simulating SSH and web services to capture real-world attack attempts and reconnaissance activity.
- Implemented centralized logging, security event collection, attack pattern analysis, security event correlation, and automated reporting to simulate SOC operations workflows.
- Collected and analyzed authentication failures, brute-force attacks, scanning activity, and suspicious behavior to support threat detection and incident investigation.
- Applied anomaly detection and attack classification techniques to improve threat identification and security analytics capabilities.
- Simulated SIEM-style security event aggregation, correlation, and alert generation workflows using centralized log collection.
- Generated threat intelligence dashboards and attack trend reports to enhance operational visibility and cybersecurity research.

TraceLink — Geolocation Intelligence Platform

- Developed an IP-based geolocation intelligence platform correlating geospatial information with network metadata for security investigations.
- Implemented AES-256 encryption for secure telemetry exchange and anomaly detection heuristics to identify suspicious network activity.
- Enhanced visibility into network assets and supported threat intelligence analysis through geolocation-based monitoring.

Secure Scout — Automated Vulnerability Scanner

- Built a Python-based vulnerability assessment workflow integrating Nmap for host discovery, service enumeration, and security assessment.
- Performed automated vulnerability identification and mapped findings to OWASP Top 10 categories to support vulnerability management processes.
- Generated remediation-focused reports to streamline security reviews, risk prioritization, and vulnerability tracking.

CERTIFICATIONS

CompTIA Security+ Certification	2026
HackerRank SQL (Basics and Intermediate)	2026
Google Cybersecurity Professional Certificate	2025
HackerRank Python	2024
Deloitte Australia Cyber Simulation	2024
Tata Cybersecurity Simulation	2024
